GREENHOUSE MAY TEAM UP

The Pittsburgh Life Science Greenhouse hopes to team up with a similar group in the Cleveland-Akron, Ohio, area in an effort to boost economic development opportunities in the biomedical and bioscience industries. The local Greenhouse is exploring a cross-state-border agreement with BioEnterprise, of Cleveland, designed to stimulate growth in "regional start-ups and to develop a joint awareness campaign directed toward the venture capital community," according to a statement. Formal announcement of the plan to pursue the initiative is to be announced today.
