

The Global Center Fact Sheet

The Global Gateway to Healthcare Solutions

The Global Center for Health Innovation is the platform where global healthcare leaders – industry, health systems, investors, and innovators – convene and collaborate to develop solutions to solve high-priority healthcare issues. Current stakeholders and tenants provide a world-class foundation of assets that draw additional global healthcare brands to mix with innovative startups and funders. Together, these groups form a vital environment to solve strategic healthcare problems that no one company can address individually. Through programs that convene respected thought leaders, the Global Center serves as a catalyst to define and develop solutions to achieve measurable improvement in our healthcare system.

New relationship with BioEnterprise

The BioEnterprise team, collaborators, and sponsors have moved into the Global Center. BioEnterprise leads strategy, marketing, programming and tenant engagement activities.
